Your home in **one app**

Turn any device into a smart device

As part of Nexxt's home automation series, the **Smart Wi-Fi neon light strip LED RGBIC** is designed to light up and transform any room with its millions of possible light color combinations.

The Nexxt Home app allows to control your neon light strip from anywhere and set the mood for all occasions. You can also use your virtual assistant —Alexa, Siri or Google Assistant— to manage your light strip through voice commands. And if you are in the mood for a party, your Smart Wi-Fi neon light will join you to dance to the music thanks to a handy sound sensor. Installation is super easy for you to revamp any room in a heartbeat.

Highlights

• Segmented light effects for dynamic color combinations.
• Its RGBIC technology allows to reproduce millions of colors.
• The strip flexibility allows you to create all kinds of shapes.
• Its IP65 classification make it good for indoors and outdoors.
• Dimmable lights for even more lighting effects.
• Music sync will bring your playlist to life with dynamic lighting effects.
• Be your light strip's boss through voice control.
• Interact with your home from anywhere in the world through the application.
• Form groups to link multiple LED lights or lamps together to instantly create a captivating atmosphere throughout your home.
