 Your home in **one app**

Smart feeding and caring for your pet

Nexxt Solutions fits your mobile lifestyle with its Home Automation series. Every product in this range aims to create a more secure environment for your home. This time introduces the Smart Wi-Fi® Pet Feeder and Water Dispenser, an innovative food and water dispenser designed to ensure your pet's well-being, even when you're not at home.

If you could, we know that you would spend all your time with your pet, but often times we have to work and deal with other issues. Also, we understand the anguish you feel when the day gets longer outside and you haven't fed your pet. Thanks to this device, you can say goodbye to all those worries. Through this smart dispenser, you can schedule meals, portion them, monitor their feeding in real time and keep your furry friend always hydrated. Its integration with the Nexxt Home app is practical as you can control this device from anywhere using your smartphone or tablet. Even when you're away from home, its built-in 2K resolution camera allows you to see and interact with your pet despite the nightfall. In addition, you can record messages and schedule playback to remind your pet when it's time to eat. This device keeps your pet close to you even when you are far away.

Highlights

- Automatic food and water dispenser suitable for dogs, cats and other small to medium sized pets
- Programmable schedules to define the serving, time and frequency of each meal
- Adjustable portions ensure the right amount of food according to each pet's needs
- Dry food bowl holds up to 169 fl. oz. and water bowl holds up to 118.3 fl. oz.
- Dual band Wi-Fi for faster connection
- Built-in camera has 2K resolution to see what your pets are doing when they are left home alone, and to talk to them whenever you want to from wherever you are
- Pet-proof design: lid seals tightly to keep food fresh, safe and moisture-free
- Dual power source: dispenser is battery and mains operated
- Water tray and food bowl are easily removable and enable quick cleanup
- Sturdy and robust construction ensures maximum stability, durability and safety of use
