

RSO-08T

The Forza Audio and Video Surge Protector safeguards your office equipment and sensitive electronics from power surges and spikes that can eventually destroy or degrade the performance and reliability of your expensive equipment.

The RSO-8T unique socket design is versatile and convenient. Its eight rotating outlets allow you to accommodate bulky plugs and adapters that don't seem to fit easily in any standard outlet. By incorporating multiple Metal-Oxide Varistors (MOV) that respond within one nanosecond to voltage spikes and surges, the RSO-8T greatly minimizes the risk of permanent damage caused by irregularities in the power line.

Highlights

- Optimized for home and office equipment
- Grounds AC power through 8 surge-protected outlets
- Filters EMI/RFI noise up to 58dB reduction
- Metal Oxide Varistor technology provides enhanced protection for electronic components against voltage spikes
- Lighted main On/Off switch
- User-resettable circuit breaker provides easy recovery from overloads (15A)
- Protection indicator and ground connection indicator lights
- Cord management system: avoid cable clutter by keeping them perfectly organized

Ideal for

MPN	RSO-08T
Input	
Voltage	220-240VAC
Frequency	50/60Hz (autosensing)
Watts	1800W
Amps	15A
Surge rating	2160J
Maximum spike current	144,000 amps
AC plug style	NEMA 5-15P
Output	
Outlets	8 NEMA 5-15R
Overload protection	Included
Physical appearance	
Switch	Resettable
Housing	Flame retardant ABS plastic
Color	Black and grey
Cord length	6ft
Dimensions	13.5x2x2.1in
Weight	1.7lb
Additional information	
Warranty	Lifetime
